Node.js    Python    Angular

"Our doubts are traitors, and make us lose the good we oft might win, by fearing to attempt." - Measure For Measure Act 1 Scene IV

Hi Gillian,

My name is Elisabeth Winter, I am a Front-end Developer interested in the junior web developer position you were looking to fill on LinkedIn. I know that Creative Circle is looking to match the best candidates to their clients and I think my experience could add a lot of value to your client's team. Before my move to Web Development I built almost a decade of experience in management and team development and I'm excited to for the chance to apply those skills in a new role.

I have recently completed Juno College's web development curriculum and while attending Juno I had the chance to develop multiple projects, both in teams and individually using a variety of tools including: HTML5, CSS3, JavaScript, React, jQuery, Firebase, and RESTful APIs. I love the problem solving aspect of being a web developer and the chance to engage with interesting and creative designs to build beautiful, easy to use, and accessible websites and applications. To see more of what I have created I welcome you to visit my portfolio here.

In my previous role I always focused on creating a stellar customer experience. I used empathetic interpersonal skills while interacting with clients, maintaining communication lines as I implemented solutions, and directed multiple teams toward long term goals.

In closing, the Junior Web-Developer role would be an exciting opportunity for me to contribute my knowledge, experience, and qualifications to your client's team. I look forward to the opportunity to speak with you more about working together! Feel free to use my Calendly to schedule a time to chat!

Regards,

*Elisabeth Winter*
